

# BLANK PERIODIC TABLE

The image shows a blank periodic table grid. The grid is composed of black lines forming a series of rows and columns. The layout is as follows:

- Row 1: 1 cell on the far left, 1 cell on the far right.
- Row 2: 2 cells on the far left, 6 cells in the middle-right, 1 cell on the far right.
- Row 3: 2 cells on the far left, 6 cells in the middle-right, 1 cell on the far right.
- Row 4: 18 cells in a single row.
- Row 5: 18 cells in a single row.
- Row 6: 18 cells in a single row.
- Row 7: 18 cells in a single row.
- Row 8: 14 cells in a single row, starting from the 3rd column.
- Row 9: 14 cells in a single row, starting from the 3rd column.

A red staircase line is drawn on the grid, starting from the top-right corner of the 2nd row, 6th column, and moving down and left in a series of steps to the top-right corner of the 7th row, 1st column. This line indicates the boundary between the s-block (left) and the p-block (right).
